

Friends of the Shelter Presents Humane Education for Northern New Mexico Kids!

We are now offering humane education presentations for schools, scouts, and other youth groups. Our organization seeks a humane and sustainable world for all animals—a world that will also benefit people. One way that we seek to achieve this goal is by conducting hands-on programs that make ours a more humane world.

Friends of the Shelter celebrates pets, as well as wildlife and habitat protection. The goal of our humane education program is instilling good values in children. Our educational materials teach children the importance of treating people, animals, and the environment with kindness and respect.

Our educational programs utilize materials provided by Humane Society Youth. The presentations are designed for kids in kindergarten through 6th grade and are 30-50 minutes in length, depending on the age of the kids. Our core program is based on “Pet Pals” curriculum, which has separate content for Grades K-2, 3-4 and 5-6, and features bi-lingual content and worksheets.

Please contact us today at 660-1648 to schedule a presentation and help your kids learn the value of kindness!
